

## UNIFORM FBH 150

### Product Description:

UNIFORM FBH 150 is a non-chlorinated oil and is developed with highly refined mineral oil for the metal forming processes such as drawing, stamping and punching. It is able to provide a stable lubricating film required in the forming of metals and also enhances the metal protecting properties.

The heavy treat-rate of non-traditional EP additives also ensures sufficient protection to the form tool, resulting in a high standard of work finish as well as precision.

### Applications / Benefits:

- ▣ Enhanced die life.
- ▣ Provide high quality finishes and accuracy.
- ▣ Non-chlorinated.

### Typical Characteristics:

Test Description	Method	Typical Result
Specific Gravity @ 15C	ASTM D 4052	0.91
Flash Point, C	ASTM D 92	> 220
Kinematic Viscosity@40C (cSt)	ASTM D 445	130
Color	ASTM D 1500	7.5
Copper Corrosion, 3h/100C	ASTM D 130	1b
